

At Millbrook School we use the Family App for our Nursery and Reception children.

### **What is Family?**

- Fully encrypted, GDPR-compliant app that allows you and your child's setting to access important information quickly.
- Access pictures, videos, observations and announcements via the newsfeed, your child's profile, and direct messages.
- Stay involved in your child's day with real-time updates straight to your phone
- Paying directly in the app is possible with Family Pay (if your child's setting chooses to enable this).

### **How do I use Family?**

The app enables the setting to update your child's daily activities. You can find all of this information on your child's activity feed, on their profile, and you can also choose to receive notifications about these events too.

Add or edit your child's information

The app enables the setting to store information about the children in order to provide the best possible care.

The Journey tab in your child's profile

You will be able to access your child's Learning Journey to see observations and write your own!

Send and Receive Messages

You will be able to send messages directly to your child's setting via the App and also receive them.

View your invoicing and account history

Check and keep up to date with your invoices.

**We will send you a login link when your child joins one of our Reception Classes.**
